Enterprise Apps | Delivered

Case Study

Problem Statement

To provide a solution where administrators can track all mobile field engineers and their associated works. The architected solution should enable users to complete job orders on assigned time and quality.

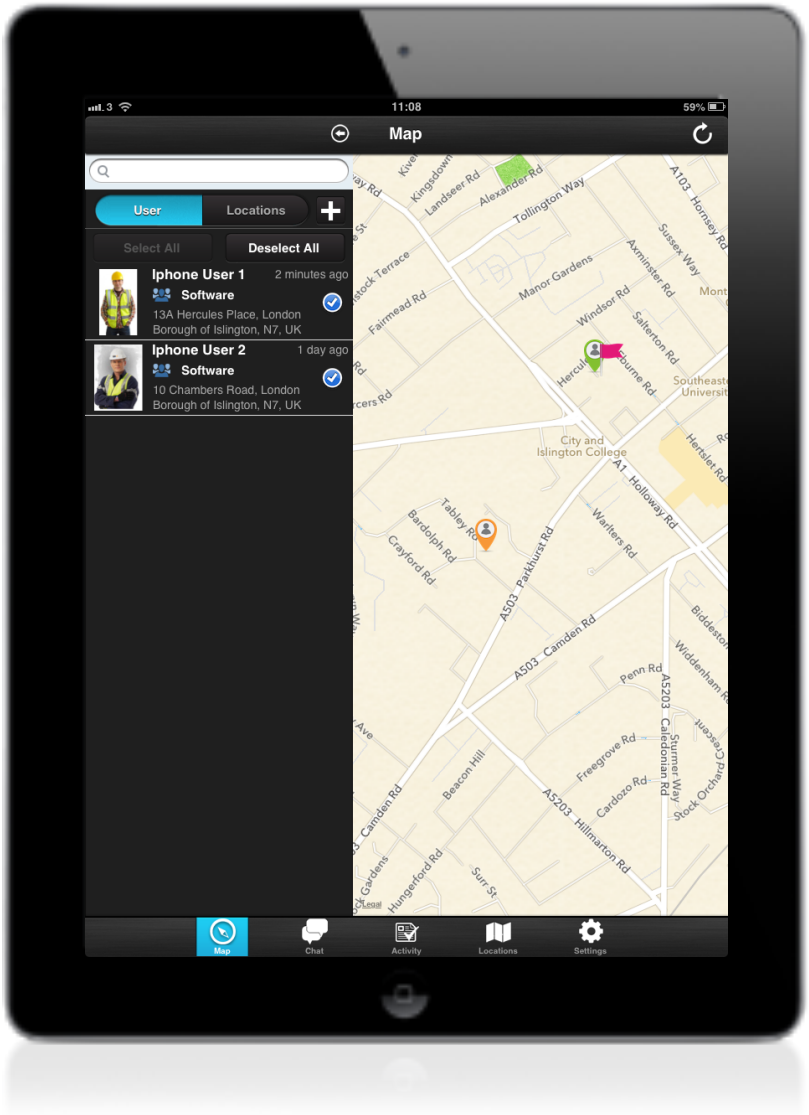
Simplifying mobile workforce

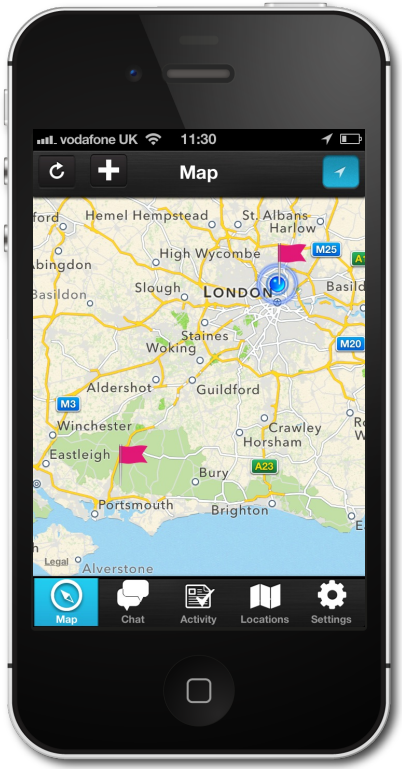
Track your jobs and your workforce

Construction utilities | Built environment landscaping | Haulage plant hire deliveries | Charities logistics events | Facilities management Security manufacturing | Sales and marketing Healthcare | Defence | Distribution

The Solution:

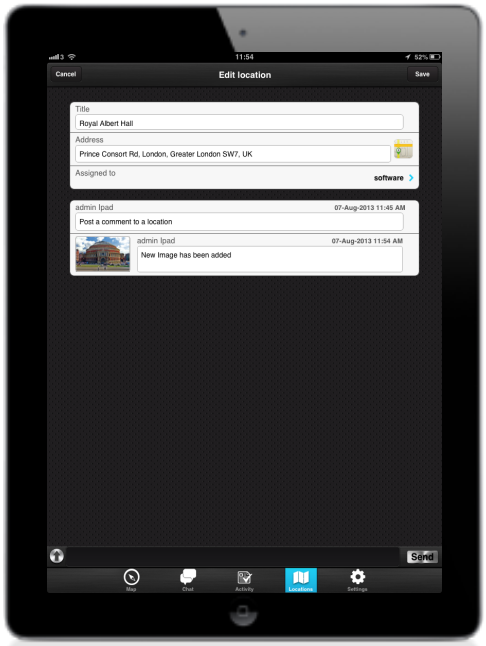
- Tablet (iPad / Android Tab) for Administrators
- Android App / iPhone App for users
- Web Interface (optional)
- Two way communication
- Enterprise Deployment
- Low per user License Fee

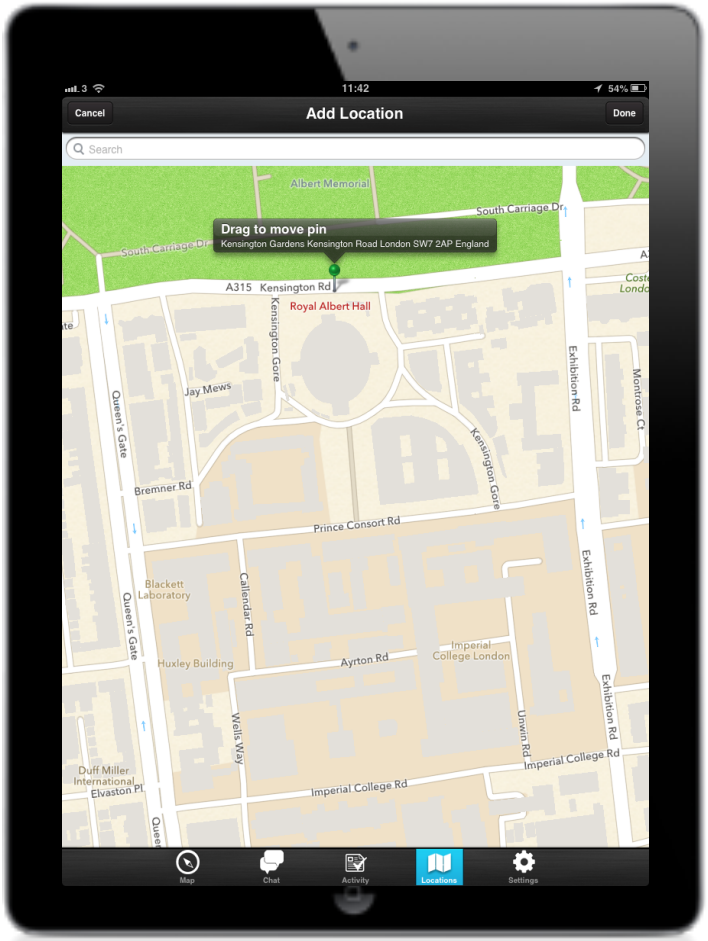


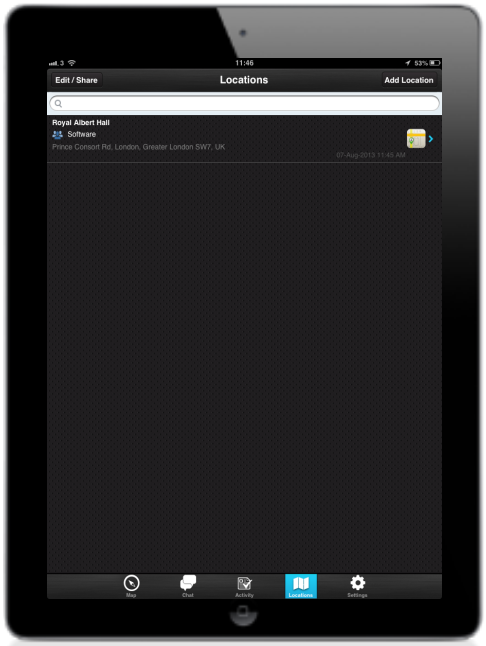


Track

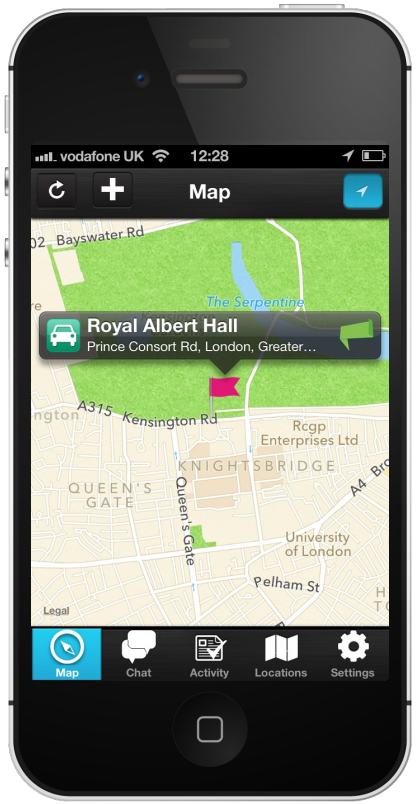
everyone on a map

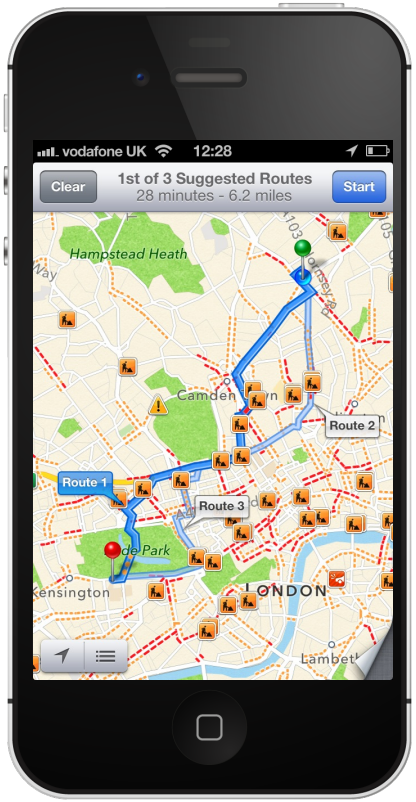


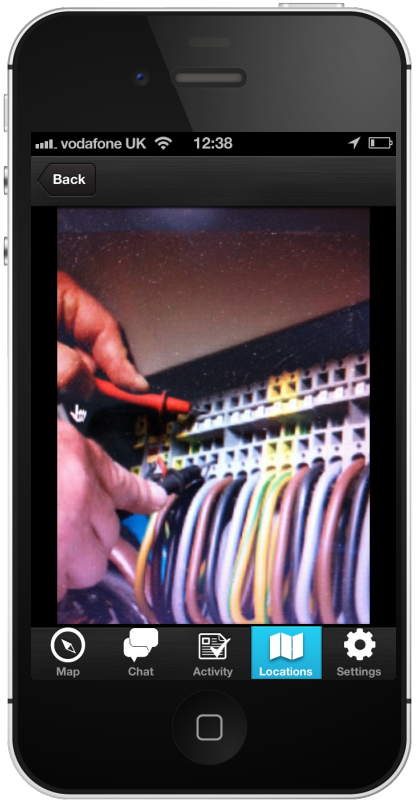


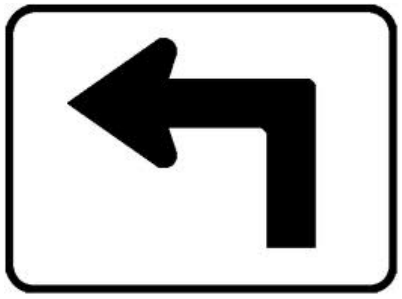


Comments by Location | Imagery for compliance





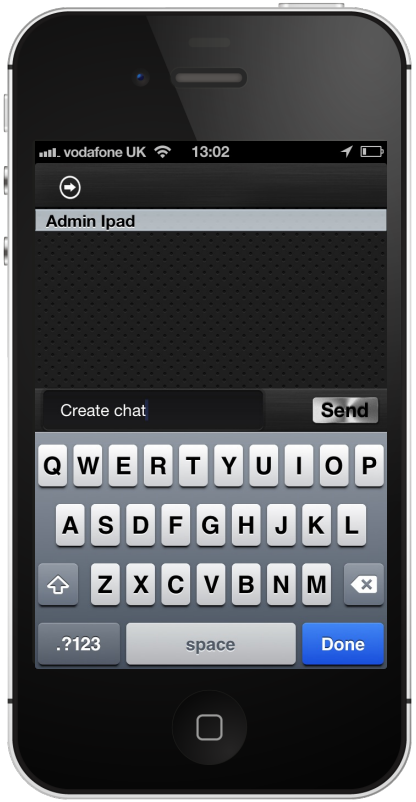


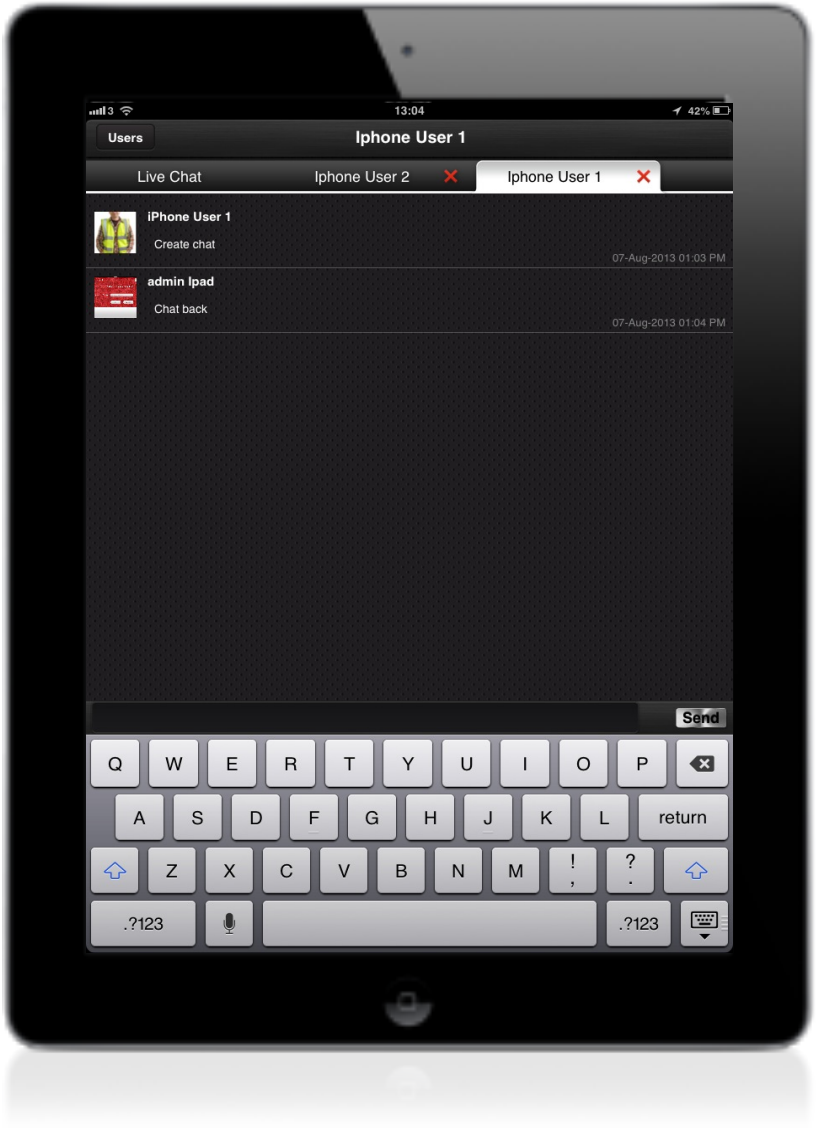


Directions to work locations and

evidence their work via pictures

Technology
• Amazon Web Services
• Chat Server
• Location Services
• Socket Services
• Real PUSH via Pusher
• .NET Framework
• Social Media Integration
• Export to Dropbox
• Reporting Mechanism





CHAT with Admins / other users

Conclusion

Creating an app like RelayLite whether for employees or administrators requires an infrastructure beyond code.
